

# Exercise 7 Library Management system by Munawar

## Exercise 7

Create a Library management system which is capable of the issuing in the students.

Books should have info like:

1. Book name
2. Book Author
3. Issued to
4. Issued on

User should be able to add book. Return issued books. Issued books.

Assume that all the users are registered with their names in the control database.

## Source Code

```
import javax.naming.CannotProceedException;
import java.lang.reflect.Array;
import java.time.LocalDate;
import java.time.LocalDateTime;
import java.time.format.DateTimeFormatter;
import java.util.*;
import java.time.LocalTime;

public class NewTask {
    public static void main(String[] args) {

        // Create a Library management system which capable of issuing books
        // to the students
        // Book should have info like
        // 1. Book Author
        // 2. Issuer to
        // 3. Issued On
        // Book Name
        // User should be able to add books , return issued book, issue books.
        // Assume that all the users are registered with their names in the
        // control database
    }
}
```

Thank You
