

# Exercise 5 Creating Custom Package by Munawar

## Exercise 5

You have to create a package name.MunawarJohar. Shape.

This package should use inheritance to properly manage the code.

Include methods like volume, surface area and getters/setters for dimensions.

## Source Code

```
import javax.swing.plaf.synth.SynthTextAreaUI;
import java.util.Scanner;
import java.util.Random;

public class Main {
    public static void main (String [] args) {
        //      You have to create a package name.codewithharry. Shape.
        //      This package should use inheritance to properly manage the
        code.
        //      Include methods like volume, surface area and getters/setters for
        dimensions.

    }
}
```

Thank You
