

Hash Set in Java by Munawar

Hash Set

Focus in the practice.

Source Code

```
import java.lang.reflect.Array;
import java.util.*;

public class NewTask {
    public static void main(String[] args) {

        // visit the java 19 documentation
        HashSet<Integer> myhash=new HashSet<>(6,0.5f);
        // In hash set value cannot be duplicate for example 10 add 2 times
        but only show in 1
        myhash.add(10);
        myhash.add(20);
        myhash.add(10);
        myhash.add(5);
        System.out.println(myhash);

        // clear () clear all the elements in set

        // remove
        myhash.remove(10);
        System.out.println(myhash);
    }
}
```

Thank You
